.DE

Der Idrosee* (Lago d'Idro) ist neben dem Gardasee und dem Comosee einer der besten Windsurfseen Norditaliens. Durch die geographische Lage der Region entsteht täglich der thermische Südwind des Idroseees, ähnlich dem Wind am Gardasee. Die gemäßigte toutsische Infrastruktur und das saubere, herrlich klare Wasser machen den See zudem zu einem idealen Ort zum Entspannen und Wohlfühlen. Im Hochsommer steigt die Wassertemperatur auf über 23°C. Ausser für Wassersportarten eignet sich das Gebiet hervorragend für diverse Bergsportarten.

Surfen kann jeder lernen, auch du! Durch ständige Betreuung (und Motorbootservice) ist Sicherheit und ein rascher Erfolg gewährleistet. Da wir den Unterricht individuell gestalten, müssen Sie sich nicht auf bestimmte Kurszeiten und aufeinander folgende Tage festlegen. Für weitere Fragen stehen wir Ihnen gerne zur Verfügung.

.IT

Il Lago d'Idro*, insieme al Lago di Garda e al Lago di Como, è uno dei migliori laghi dell'Italia settentrionale per il windsurf. Grazie alla posizione geografica favorevole, ogni giorno ci si forma un vento termico che soffia nelle ore pomeridiane, simile al vento del lago di Garda. L'adeguata infrastruttura turistica e l'acqua particolarmente pulita e limpida rendono il posto ideale per trascorrere una vacanza rilassante e piacevole. In estate la temperatura dell'acqua raggiunge i 23°C e più. Ciononostante il lago è ritenuto un consiglio confidenziale. Oltre agli sport acquatici, nella regione si può anche praticare sport di montagna.

Ognuno può imparare il windsurf. Il corso è organizzato individualmente, così è possibile variare orari e giorni. Siamo lieti di conoscervi e per qualsiasi altra informazione non esitate a contattarci, siamo sempre a vostra disposizione.

.NL

Het Idromeer* (Lago d'Idro) behoort, samen met het Gardameer en het Comomeer, tot de beste surfmeren van Noord-Italië. Door de geografische ligging ontstaat dagelijks vanaf het middaguur een thermische zuidenwind, welke ook in een vergelijkbare vorm bij het Gardameer te vinden is. Het Idromeer wordt steeds bekender, maar het is nog altijd een geheime tip. Ondanks toenemend toerisme is het water zeer schoon en helder en de watertemperatuur is in de zomer meer dan 23°C. Naast het beoefenen van watersport is het gebied ook zeer geschikt voor de bergsport.

Surfen kan iedereen leren, dus u ook! Onze instructeurs geven dagelijks training aangepast op het individu, waardoor u vrijheid heeft in het inplannen van uw lessen en u de basishandelingen snel en op een verantwoorde wijze onder de knie krijgt. Voor vragen en meer informatie staan wij graag tot uw beschikking.

.UK

Lake Idro* (Lago d'Idro), along with Lake Garda and Lake Como, is one of the best windsurfing lakes in Northern Italy. Daily at around midday, due to the geographical location of the lake, a southern thermal wind builds up, similar to the wind on Lake Garda. Although the lake is popular with numerous regulars it still remains a secret tip. Despite a good infrastructure for tourism the water is clean and marvellously clear. In midsummer the water temperature remains above 23°C. Apart from water sports the area is excellently suited for various kinds of mountain sports.

Anyone can learn to surf, also you! As we plan the lessons to suit the individual it is not necessary to commit yourself to fixed times on consecutive days. We look forward to meeting you and will be happy to answer any questions and to provide you with further information.
